PROJECTS

EasyRide-cab booking webapp | MERN (Full-Stack)

- Built a full-stack cab booking platform with user and captain authentication, ride booking, and role-based dashboards.
- Integrated real-time location tracking and ride updates using sockets and maps APIs.
- Designed responsive UI with React.js & Tailwind CSS, and managed backend with Node.js, Express, and MongoDB.

BehaviourBee | Next.js, Firebase, Google cloud Api's, Gemini Ai

A web platform to connect parents with child behavior specialists and manage behavioral assessments online.

- Built with Next.js 14, featuring dynamic routing, SSR, and secure API routes.
- Integrated Firebase (Auth, Firestore, Storage) for real-time data and user management.
- Deployed on Google Cloud Run using Docker for scalable, serverless hosting.
- Developed responsive UI with Tailwind CSS and modular component architecture.

EXPERIENCE

Gravit InfoSystem Pvt Ltd. | Software Developer

Mar 2025- Sep 2025

- **AI Proctored Exam Portal**

Built interactive and responsive front-end components in React, including student dashboards, practice tests, and admin panels.

Integrated APIs for authentication, event management, and real-time student participation, ensuring a seamless user experience.

- **Developed a modern, fully responsive website using React to showcase the company's services and portfolio.**

Collaborated with the team to ensure clean UI/UX design and smooth performance across devices.
